PROFESSIONAL SUMMARY

Final-year B.Tech (AI & Data Science) student and Full Stack Developer with hands-on experience building end-to-end web applications and ML/RAG-integrated platforms. Skilled across front-end, back-end, and database layers, with practical exposure to AI/ML through two internships. Delivered four independent full-stack projects spanning sustainability tech, agri-tech, IoT-style automation, and generative AI. Seeking a Full Stack Developer role to build scalable, user-centric products.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Front-End: HTML5, CSS3, Responsive Web Design

Back-End: Python, Node.js.

Databases: MySQL, MongoDB

ML / AI: Pandas, NumPy, Scikit-learn, N8n Automation

Tools & Cloud: Git, GitHub, Vercel, Google Cloud, VS Code

EDUCATION

B.Tech — Artificial Intelligence & Data Science

Expected 2027

Dr. NGP Institute of Technology, Coimbatore

CGPA: 7.34 (up to 5th semester)

HSC (Class 12)

April 2023

Ponnu Matriculation Higher Secondary School, Dharapuram

Score: 80.6%

SSLC (Class 10)

June 2021

Ponnu Matriculation Higher Secondary School, Dharapuram

PROJECTS

GreenMetric Footprints — Carbon Tracking & Sustainability Platform | *HTML, CSS, JavaScript*

- **Built** a full-stack web application enabling organisations to measure, monitor, and reduce carbon emissions through structured calculators and visual insights.
- **Implemented** carbon footprint calculators covering energy usage, transportation, and waste for data-driven sustainability decisions.
- **Developed** an interactive analytics dashboard displaying emission trends, performance metrics, and historical data.

AgriSmart — Cooperative Farming Platform | *HTML, CSS, JavaScript (Frontend deployed on Vercel; backend not hosted)*

- **Developed** a feature-rich web application connecting farmers, workers, and buyers to streamline agricultural collaboration and resource management.
- **Built** role-based dashboards with AI-powered crop advisory, marketplace, and job/shift management modules.
- **Implemented** multi-language support (English, Hindi, Tamil), responsive design, and real-time updates.

GitHub: <https://github.com/Sabari7866/Cooperative-Farming-System> | *Live Demo:* <https://cooperative-farming-system.vercel.app/login>

Smart Parking Management System (SPS) | *HTML, CSS, JavaScript (Frontend deployed on Vercel; backend not hosted)*

- **Developed** a parking management application that automatically allocates available slots and guides drivers with clear directions.
- **Implemented** dynamic slot-assignment logic based on real-time availability, supporting multiple vehicle brands and models.
- **Enhanced** usability by structuring vehicle details clearly and providing a real-time parking status display.

GitHub: <https://github.com/Sabari7866/sps> | *Live Demo:* <https://sps-zeta.vercel.app/>

AI Knowledge Assistant — RAG-Powered Chatbot Platform | *Python, Vector Embeddings, Vector Database*

- **Developed** an intelligent AI chatbot using Retrieval-Augmented Generation (RAG) architecture for contextual question answering.
- **Integrated** document ingestion, vector embeddings, and retrieval pipelines to ground model responses in relevant knowledge.
- **Designed** multi-turn conversational workflows with dynamic context management.

INTERNSHIP & TRAINING EXPERIENCE

AI & ML Intern — Gateway Software Solutions, Coimbatore | *9 June 2025 – 24 June 2026*

- Gained hands-on experience with real-world AI and ML application development.
- Assisted in data preprocessing, model training, and evaluation using industry-standard practices.
- Developed and tested ML models, contributing to team-based software development workflows.

Generative AI Intern — Prodigy InfoTech (Remote) | *1 Feb 2026 – 28 Feb 2026*

- Explored RAG pipelines, LLM-based application workflows, and prompt engineering techniques.
- Worked on chatbot development, embeddings, and contextual system design.
- Gained exposure to modern generative AI tools and frameworks relevant to web-integrated AI features.

CERTIFICATIONS

- Simplilearn — Introduction to Generative AI Studio (Powered by Google Cloud)
- Simplilearn — Introduction to Responsible AI (Powered by Google Cloud)
- MongoDB — Introduction to AI and Vector Search
- Saylor Academy — Building with Artificial Intelligence (80.39%)
- NPTEL — Human Computer Interaction (84%, Elite Silver)

AREAS OF INTEREST

Full Stack Web Development • Artificial Intelligence & Machine Learning • Data Science & Business Analytics • Generative AI & LLM Applications

CO-CURRICULAR ACTIVITIES

• Listening to Music • Playing Cricket • Exploring New Tech Trends • Reading Tech Blogs
